The Story Behind

Santa Ynez Valley Cabernet Sauvignon

Harvested from grapes grown at our Winery Estate, our Santa Ynez Valley Cabernet Sauvignon reflects the best qualities of Santa Ynez Valley Cabernet Sauvignon with its forward fruit and great acidic structure. The gravelly, well-drained soil and slightly warmer climate at the Winery Estate (compared to PMV) is a perfect match for Cabernet Sauvignon. Planted on the hilltops and slopes of the property where there is the least amount of topsoil, the vineyard is planted with higher density to moderate the amount of fruit each vine has to ripen. Also, the vineyard is planted with three great Cabernet Sauvignon clones each adding to the complexity of the finished wine.
